## **DETAILED ACTION**

The following restriction requirement is being set forth as a group was inadvertently left out of the previous restriction requirement.

## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16 and 20, drawn to a method and kit for detecting compounds that modulate topoisomerase activity, classified in class 435, subclass 6.
  - II. Claim 21, drawn to a method of screening compounds capable of modulating nucleic acid modifying enzymatic activity, classified in class 435, subclass 6.
- 2. The inventions are distinct, each from the other because of the following reasons: The methods of group I encompass the sep of assaying for nucleic acid religation, whereas the methods of group II encompass methods of assaying for nucleic acid cleavage, which require different reagents, reaction parameters and reaction conditions. The method of screening compounds capable of modulating nucleic acid-modifying enzymatic activity of group II encompasses detecting compounds that modulate enzymes other than topoisomerases, and the step of assaying for nucleic acid *cleavage* does not appear to be obvious over the method of detecting compounds that modulate topoisomerase activity by assaying for nucleic acid *religation*, nor does the method step of assaying for nucleic acid cleavage appear to be needed, or encompassed by the method steps of the method of group I. Further, the step of assaying for

Application/Control Number: 09/583,342 Page 3

Art Unit: 1634

nucleic acid religation of group II encompasses a step that could be used in a method of detecting modulators of nucleic acid ligases.

- 3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Jehanne Souaya whose telephone number is (703)308-6565. The examiner can normally be reached Monday-Friday from 9:00 AM to 6:00 PM.

Application/Control Number: 09/583,342

Art Unit: 1634

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones, can be reached on (703) 308-1152. The fax phone number for this Group is (703) 305-3014.

Any inquiry of a general nature should be directed to the Group receptionist whose telephone number is (703) 308-0196.
